

SolarTech Power Solutions

1 MW battery energy storage area

Overview

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) developed the first comprehensive set of guidelines for reviewing and evaluating battery energy storage systems.

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) developed the first comprehensive set of guidelines for reviewing and evaluating battery energy storage systems.

In December 2018, the New York Public Service Commission adopted Governor Cuomo's 1,500 MW energy storage target by 2025 and established a 3,000 MW target by 2030. Over \$350 million in New York State incentives have been authorized to accelerate the adoption of energy storage systems in effort of.

The state approved a plan to convert the land into one of the nation's largest battery energy storage systems. Gov. Kathy Hochul wants New York to get the majority of its energy, from clean sources like solar, by 2030. But since the sun isn't always shining, so-called "BESS" sites are critical for.
