12 billion investment in energy storage batteries

Overview

After record growth in 2024, U.S. battery energy storage systems (BESS) could grow from more than 26 gigawatts (GW) of capacity—enough to power 20 million homes—to anywhere from 120 GW to 150.

After record growth in 2024, U.S. battery energy storage systems (BESS) could grow from more than 26 gigawatts (GW) of capacity—enough to power 20 million homes—to anywhere from 120 GW to 150.

WASHINGTON, D.C., April 29, 2025 – Today the American Clean Power Association (ACP), on behalf of the U.S. energy storage industry, announced a historic commitment to invest \$100 billion into building and buying American-made grid batteries. This investment is expected to fuel the creation of.

storage projects. This investment is expected to create 350,000 jobs by 2030. Through this investment, the industry is committed to supporting American battery manufacturing leadership, ensuring low-cost affordable electricity to fuel economic growth and American energy dominance. A pro-business.

Members of the US energy industry has committed to investing \$100 billion over the next five years to build and buy American-made batteries for large, utility-scale deployments of battery energy storage systems (BESS). Executives from the American Clean Power Association (ACP) and several utility.
