

**SolarTech Power Solutions**

# **1w portable power bank**

## Overview

---

What is a portable power bank?

Small enough to fit in your backpack or laptop bag, this portable power bank is perfect for on-the-go charging when you don't have the convenience of an AC outlet nearby. With dual USB ports, you can charge two devices simultaneously including smartphones, tablets and other USB powered devices.

Are portable chargers and power banks the same?

**PORTABLE CHARGERS VS. POWER BANKS** At a surface level, it can sometimes seem like portable chargers and power banks are one and the same. However, there are some very distinct and important differences between the two.

What is a power bank & why do you need one?

Power banks are physical stop gaps that prevent dreaded cases of DPS (dead phone syndrome). Whether you forgot to plug it in overnight or you've been traveling all day without access to an outlet, these are a lifeline for you and your portable electronics.

Do you need a portable battery or power bank?

Watching your phone or tablet steadily run out of power when you're nowhere near an outlet is stressful. But there's an easy solution: a portable battery or power bank. They are available in many sizes and capacities and can include handy features like fast charging and multiple ports.

Which power bank is best for outdoor use?

If you plan to use your power bank for outdoor applications such as hunting, backpacking, and off-roading, we recommend one built to withstand rugged use. On this list, the Nestout 15,000mAh Outdoor Battery, Dark Energy Poseidon Pro 10200, and Wuben Lightok X3 Owl EDC Flashlight are all rated to withstand getting wet.
