

SolarTech Power Solutions

36 inverter changes to 220

Overview

It changes 36-volt DC power, like from batteries, into 120V or 240V AC power. This is the same kind of power you have in your home's wall sockets. It can handle a huge surge of 14,000 watts. This is good for starting motors or other things that need a lot of power at once.
