ASEAN Outdoor Energy Storage Power Station

Overview

How will energy storage technology impact ASEAN Power Grid?

Energy storage technologies, including Battery Energy Storage Systems, will play a critical role in stabilising the grid and supporting the ASEAN Power Grid. Meanwhile, the region is on track to achieve near-universal electrification by 2040, with efforts to increase access to clean cooking accelerating under the RAS and CNS. Other Analyses.

What will ASEAN's Energy Future look like?

ASEAN's power generation is expected to make a substantial shift towards renewable energy, particularly solar and wind, with the RAS and CNS leading this transition. Energy storage technologies, including Battery Energy Storage Systems, will play a critical role in stabilising the grid and supporting the ASEAN Power Grid.

Does ASEAN need energy storage?

The ASEAN bloc has set the targets of 23% renewable energy in its Total Primary Energy Supply (TPES) and 35% renewable energy in ASEAN installed power capacity by 2025. This means that energy storage is required. Additionally, without BESS acceptance on a larger level, the needed funds won't materialise, and fewer BESS will be built.

How can the ASEAN Power Grid facilitate investments in renewables?

To facilitate investments in renewables in ASEAN, it is critical to overcoming the barriers in renewable energy legislation, energy governance, and business environment. 28 Cooperation through the ASEAN Power Grid brings economic benefits to the region as a whole, and thus improves the affordability for energy transition.

Does Singapore have a battery energy storage system?

Of the 11 ASEAN members, Singapore is taking the lead in the battery energy

storage systems (BESS) space. Earlier this year, the city-state launched the region's largest battery energy storage system (BESS).

Does ASEAN have technology options to decarbonize power sector?

Faced with energy transition objectives, the ten countries of the Association of Southeast Asian Nations (ASEAN) have technology options to decarbonize power sector. This study investigates the hypothetical decarbonization pathways for ASEAN's power sector.
