Air-cooled energy storage system price

Overview

How much does the energy storage system cost?

The energy storage system is a 4MW, 32MWh NaS battery consisting of 80 modules, each weighing 3 600 kg. The total cost of the battery system was USD 25 million and included USD 10 million for construction of the building to house the batteries (built by Burns & McDonnell) and the new substation at Alamito Creek.

What is the Trane® thermal battery air-cooled chiller plant?

The Trane® Thermal Battery air-cooled chiller plant is a thermal energy storage system, which can make installation simpler and more repeatable, saving design time and construction costs.

What is an all-electric storage source heat pump?

The all-electric Storage Source Heat Pump system leverages thermal energy storage to provide cooling and heating. It captures waste energy to eliminate traditional heating equipment that relies on fossil fuels.
