# **Angola solar Energy Storage Project**

## Overview

---

WASHINGTON – The Board of Directors of the Export-Import Bank of the United States (EXIM) today approved an historic \$1.6 billion direct loan to support the construction of 65 solar photovoltaic energy mini-grids with energy storage facilities that will power water collection, treatment, and purification systems in four southern provinces in Angola. What is Angola doing with solar power?

The solar plants form part of Angola's strategy to shift toward green energy and reduce reliance on diesel generators and thermal energy. Image: The Bailundo Photovoltaic Park in Huambo province was inaugurated in early September. Source: MCA.

How many solar projects are in Angola?

In Angola, Sun Africa Constructs Seven Solar Projects Totaling 370MW - Africa's premier report on the oil, gas and energy landscape. Section: ENERGY TRANSITION · March 9, 2021 · No comments | Tags: feature, featured, gas.

Why did Angola choose Sun Africa?

When Angola wanted to strengthen their national electricity system, diversify their energy matrix, and reduce their dependence on fossil fuels, they turned to Sun Africa. The result is the Angola Solar Project, the largest renewable energy project in Sub-Saharan Africa.

Who backed Sun Africa's 370 MW solar PV project in Angola?

Sun Africa was awarded the prestigious "ECA/DFI-backed deal of the year" by "TXF Perfect 10" for Sun Africa's 370 MW solar PV project in Angola. Sun Africa initiated this project, developed it, and arranged long-term financing.

What is Angola's new energy infrastructure?

They form part of Angola's strategy to shift toward sustainable energy and reduce reliance on diesel generators and thermal power. In areas like Bailundo, where blackouts and irregular supply have been major issues, this

new infrastructure aims to stabilise the grid, said MCA.

**What is Angola's electricity access rate?**

Angola's electricity access rate was 51.1% in 2023, representing a 2.6% increase from 2022, according to the World Bank. The country's government had set itself a goal to achieve a 60% electrification rate by 2025. Contact our sales team to position your solar brand
