Are Syrian solar panels any good

Overview

Syria is working to rebuild its energy sector after years of civil war and crippling sanctions. The country has suffered severe electricity shortages, with only those who can afford them using costly solar panels or generators.

Syria is working to rebuild its energy sector after years of civil war and crippling sanctions. The country has suffered severe electricity shortages, with only those who can afford them using costly solar panels or generators.

This geographic advantage makes solar energy a highly suitable solution for the country's ongoing power problems. Solar energy offers several key benefits: Availability: The sun shines almost year-round in Syria, especially in arid and semi-arid regions. Independence: Solar power reduces dependence.

As the nation seeks stability and recovery, renewable energy—particularly solar power—is emerging as more than just a temporary fix; it represents a potential long-term solution. This article explores Syria's transition towards solar energy, highlighting government initiatives, private investments.

This report was produced as part of the second round of Al-Jumhuriya's Grant Program for Syrian Women Journalists, which supports the production of in-depth journalistic projects related to topics of public interest in Syria or Syrian diaspora communities. The editor supervising this report was our.

Even though solar panels are considered a luxury across the globe, the area of war-torn Idlib is full of solar panels. These solar panels are many citizens' only source of electricity and heat. Idlib is also the stronghold of Hay'at Tahrir al-Sham (HTS), which has been labeled a terrorist.

Syria's largest city was mostly pitch-black, the few speckles of light coming from the other households able to afford solar panels, batteries, or private generators. Al-Jenan went thousands of dollars in debt to buy his solar panel in 2019. It was an expensive coping mechanism at the time, but.

This solar panel has transformed life in Khirais. Ruba, whose fridge is now powered 24/7, began processing milk and cheese again, eliminating the need

for a middleman. Because we have electricity now, I'm working more hours and producing more products. I can get more revenue. Her nephew, Hayderah. Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricity despite its high costs and regardless of the controlling parties.

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria, reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

Does Syria have solar energy?

Northeastern Syria, which is mostly under the control of the Autonomous Administration, is witnessing the spread of solar energy systems, like most Syrian regions, but they seem to be limited in the homes and facilities of families living in a good economic situation, according to what Enab Baladi monitored.

Is putting solar panels on roofs a solution in Syria?

"The solution to the problem isn't putting solar panels on roofs," Syria's interim Energy Minister Mohammad al-Bashir told The Associated Press. "It's securing enough power for the families through our networks in Syria. This is what we're trying to do."

Are solar panels allowed in Syria?

The Syrian Interim Government (SIG), which controls areas of rural Aleppo, issued a decision last May, excluding solar panels from customs duties at all crossings for a period of three months, until 31 July.

How much does a solar panel cost in Syria?

The price of a panel capable of charging a small battery and lighting a room is about 80,000 Syrian pounds, regardless of its quality, while the monthly salary of her husband, who is an employee in an agricultural establishment affiliated with the Syrian regime, is about 110,000 Syrian pounds.
