There are four general types of solar projects. "Residential solar" means solar panels to power a single house. The panels are typically mounted on a homeowner's roof, but could also be mounted in the backyard (this is called a "ground-mount array") or on the roof of another structure on the.

Federal and (depending on where you live) state incentives make installing solar panels on the roof of your house a fairly affordable, money-saving home improvement project. But new federal legislation has accelerated the expiration of the 30% tax credit for homeowner-owned solar systems, moving.

Generate your own clean energy from the sun for free with solar. Add Powerwall to store your energy for use anytime you need it. Flexible financing and low monthly lease options can help you secure the best price for your solar system. By installing solar panels, you can also reduce your reliance.
