# **Are there solar panels in Tunisia**

## Overview

---

Tunisia is accelerating its energy transition by awarding 4 solar photovoltaic projects totaling 498 MW to reduce import dependency and promote renewable energy. Faced with growing energy dependency, Tunisia is taking a decisive step forward in its commitment to renewable energy.

Tunisia is accelerating its energy transition by awarding 4 solar photovoltaic projects totaling 498 MW to reduce import dependency and promote renewable energy. Faced with growing energy dependency, Tunisia is taking a decisive step forward in its commitment to renewable energy.

On average, Tunisia's sunshine exceeds 3,000 hours per year with some regions naturally having more hours than others do. Most regions in the south of the country have a solar exposure time of at least 3,200 hours per year, with peaks of 3,400 hours per year in the Gulf of Gabès (south-east). On.

Discover comprehensive insights into the statistics, market trends, and growth potential surrounding the solar panel manufacturing industry in Tunisia. There is an average of 2993 hours of sunlight per year. Tunisia boasts an impressive solar energy potential, with an average annual global.

The country has very good solar radiation potential which ranges from 1800 kWh/m<sup>2</sup> per year in the North to 2600 kWh/m<sup>2</sup> per year in the South. The total installed capacity of grid-connected renewable power plant was around 342 MW in 2016 (245 MW of wind energy, 68 MW of hydropower and 15 MW of PV).

The Tunisian government has granted licenses to four PV projects with a combined capacity of 500 MW. The selected developers are Qair International, Voltalia, Toyota Tsusho and Scatec. Tunisia's Minister of Industry, Mines and Energy, Fatima Al-Thabat Shabb, has approved four solar projects with a.

Tunisia is accelerating its energy transition by awarding 4 solar photovoltaic projects totaling 498 MW to reduce import dependency and promote renewable energy. Faced with growing energy dependency, Tunisia is taking a decisive step forward in its commitment to renewable energy. On December

26.

We are 50% operators of the Tataouine photovoltaic power plant in Tunisia, which is connected to the national grid. The construction of the plant is due to the joint venture entered into between Eni and the state company Entreprise Tunisienne d'Activités Pétrolières (ETAP), which is dedicated.
