Argentina New Energy solar Module Project

Overview

State-owned EPSE is moving ahead with its plan to establish a vertically integrated solar cell and module manufacturing facility in Argentina's Pocito department, San Juan province. The arrival of an industrial laminator marks a major milestone for the long-delayed project.

State-owned EPSE is moving ahead with its plan to establish a vertically integrated solar cell and module manufacturing facility in Argentina's Pocito department, San Juan province. The arrival of an industrial laminator marks a major milestone for the long-delayed project.

Energía Provincial Sociedad del Estado (EPSE) says production at its new vertically integrated solar factory in San Juan, Argentina, will start soon as key equipment arrives from China. A worker inspects a laminator in the solar panel factory of state-owned firm Empresa Provincial Societaria del Estado in San Juan, Argentina. The plant is the first of its kind in Latin America, importing most of its materials from China (Image: Matias Avramow) Lucas Estrada is confident.

Argentina is charting a new course in its renewable energy sector with the launch of its first solar panel factory. This groundbreaking facility will significantly reduce the country's reliance on imported panels while bolstering local manufacturing. Located in the sun-drenched San Juan Province.

PVTIME – Argentina is set to open its landmark 1GW solar panel manufacturing plant, which is operated by the provincial energy firm Empresa Provincial Societaria del Estado (EPSE). Located in San Juan Province, near the Andes, EPSE will oversee the facility's expansion from initial panel production.

With over half the country soaking up more than 3.5 kWh/m² of solar radiation annually, they're basically sitting on a goldmine of free energy. Yet somehow, solar PV capacity only reached 2 GW by late 2024. That's like having a Ferrari and using it to deliver pizza. Argentina's sitting on a solar.

Argentina's First Solar Panel Factory Nears Completion in San Juan Argentina is on the verge of inaugurating its first solar panel manufacturing facility in San Juan province, a significant step towards enhancing the country's renewable energy capabilities. The state-backed factory is designed to.
