

SolarTech Power Solutions

Argentina solar container substation

Overview

Summary: Installing a photovoltaic container substation in Cordoba, Argentina, combines renewable energy innovation with modular infrastructure. This guide explores the step-by-step process, regional advantages, and key considerations for businesses adopting solar energy solutions. Does Argentina need a new photovoltaic plant in 2021?

Argentina continues in its efforts to increase the share of renewable energies in its energy mix, which is still heavily dependent on fossil fuels. At the end of 2021, the developer Neoen will commission a new photovoltaic plant in the province of Salta, Altiplano Solar, the second largest in the country.

How much transmission capacity does Argentina have in 2022?

Argentina had 24,840MVA of capacity in 2022 and this is expected to rise to 29,797MVA by 2028. Listed below are the five largest transmission projects by capacity in Argentina, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global transmission segment.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site.
