

## SolarTech Power Solutions

# Australia s new industrial and commercial energy storage cabinet

## Overview

---

What are the applications of energy storage system?

All-in-one, high-performance energy storage system for various industrial and commercial applications. Highly suitable for all kinds of outdoor applications such as EV charging stations, industrial parks, commercial areas, housing communities, micro-grids, solar farms, peak shaving, demand charge management, grid expansion and more.

What are the applications for energy storage and current limitations?

Applications for energy storage and current limitations are outlined as: Major grids: These will need a substantial storage capacity as dispatchable generation leaves the grid. It will need to be of varying durations to be able to deal with changes in supply and demand.

Does Australia need large-scale hydrogen storage?

Hydrogen: Large-scale storage would be required if Australia is to meet its hydrogen export ambitions. Hydrogen storage could also play a role in decarbonising heavy-duty vehicles, but it is still emerging. Maturity.

Is MGA Thermal a commercially viable energy storage solution?

Mark Croudace, CEO at MGA Thermal and a panellist at the recent Energy Storage Summit Australia 2025 in March, highlighted that the successful plant shows that the technology “isn’t just a concept – it’s a commercially viable solution ready for deployment.”
