Overview

Snowy 2.0 Pumped Storage Power Station or Snowy Hydro 2.0 or simply Snowy 2.0 is a battery megaproject in , Australia. The project expands upon the original (ex post facto Snowy 1.0) connecting two existing dams through a 27-kilometre (17 mi) underground tunnel and a new, underground pumped-hydro . It is expected to supply 2.2 gigawatts of capacity and about 350,0.

It is a nationally significant project to provide clean affordable and reliable energy for generations to come. It is projected to have an installed capacity of 2000 MW with the ability to store 350,000 MWh for over 200 hours.
