According to President Aliyev, by 2030 the total generation capacity of Azerbaijan's solar, wind, and hydroelectric power plants is expected to reach 6,000 megawatts, turning renewables into a major industrial sector for the country. Azerbaijan's plans to expand renewable energy capacity are part.

BAKU, March 27, 2025 —The World Bank today approved the Azerbaijan Scaling-Up Renewable Energy Project (AZURE), an initiative that will strengthen Azerbaijan's power transmission network, enable the country to diversify its energy mix, and meet growing electricity demand through a more resilient.

Azerbaijan is undertaking significant reforms to its domestic heating and electricity market, which involve increasing tariffs and expanding renewable energy. The Tariff Council, a small group of government insiders, unilaterally sets energy prices in Azerbaijan, leading to public disconnect. The.

Attention to energy efficiency has been growing in Azerbaijan in recent years as the country tracks its commitments under the Paris Agreement, seeks to diversify its economy and reduce its dependence on fossil fuels, which account for 90% of its export revenues, 60% of state revenues and 30-50% of.

The World Bank approved the Azerbaijan Scaling-Up Renewable Energy Project (AZURE), an initiative that will strengthen Azerbaijan's power transmission network, enable the country to diversify its energy mix, and meet growing electricity demand through a more resilient and reliable power grid. How much does electricity cost in Azerbaijan?

In response, President Emmanuel Macron pledged various government support schemes aimed at cutting electricity bills by up to 40 percent for eligible businesses. According to international price surveys (Q1 2025 data), Azerbaijan's residential electricity price is roughly \$0.05 per kWh.

How much will Azerbaijan's electricity tariff increase?

The increases range from 5 percent to 15 percent, depending on electricity usage. The average household electricity tariff was expected to increase by about 7.8 percent. The Tariff Council again cited gas costs as the reason, even though Azerbaijan's own output has been rising.

Is Azerbaijan paving the way for tariff reform?

A series of laws adopted by Azerbaijan's rubber-stamp parliament in the spring is paving the way for tariff reform in the domestic energy market, namely heating and electricity. The changes, especially when it comes to setting usage rates, are occurring with minimal public input.

What is happening in Azerbaijan?

Azerbaijan is undertaking significant reforms to its domestic heating and electricity market, which involve increasing tariffs and expanding renewable energy. The Tariff Council, a small group of government insiders, unilaterally sets energy prices in Azerbaijan, leading to public disconnect.

Will Azerbaijan introduce a fixed monthly fee for natural gas?

In June, Azerbaijani parliament approved a new regulation introducing a fixed monthly fee for natural gas usage. Under this scheme, consumers are required to pay a base rate even if they consume no gas at all. The change is set to take effect gradually starting in 2026, with full implementation by 2028.

What does Azerbaijan's tariff council do?

Azerbaijan's Tariff Council, a ministerial committee chaired by the economy minister, legally sets all electricity, gas, heat and fuel prices. In practice, this

means a small group of insiders (deputy ministers of finance, justice, energy, etc.) decide domestic energy rates behind closed doors.
