What are sodium-sulfur batteries?

Due to the intermittent nature of renewable power supply, the power producers have started the adoption of energy storage systems, along with renewable power installations. The sodium-sulfur batteries are high-temperature products that are highly suitable for grid-scale applications.

Which batteries are suitable for price arbitrage and bulk storage?

Batteries such as lead-acid, sodium-sulfur, and nickel-cadmium can be applicable for price arbitrage and bulk storage, besides other applications, as in distributed storage, mobile applications, and besides having shorter calendar life as compared to pumped hydro storage systems.
