

## SolarTech Power Solutions

# Base station lithium iron phosphate battery pack

### Battery String-S224

- 1C Charge/Discharge
- Easy configuration and maintenance
- Power supply can be single battery string or parallel battery strings

## Overview

---

What is a lithium iron phosphate (LiFePO<sub>4</sub>) battery?

Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries are a type of lithium-ion battery with a lithium iron phosphate cathode and typically a graphite anode. Compared to traditional lead-acid batteries or other lithium-ion batteries (such as ternary lithium batteries), LiFePO<sub>4</sub> batteries offer several notable advantages:.

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. Modular Design: A modular structure simplifies installation, maintenance, and scalability.

What is a 48V 100Ah LiFePO<sub>4</sub> battery pack?

Our 48V 100Ah LiFePO<sub>4</sub> battery pack, designed specifically for telecom base stations, offers the following features: High Safety: Built with premium cells and an advanced BMS for stable and secure operation. Long Lifespan: Over 2,000 cycles, significantly reducing replacement and maintenance costs.

Are LiFePO<sub>4</sub> batteries toxic?

The materials used in LiFePO<sub>4</sub> battery packs, such as iron, phosphorus, and lithium, are relatively non-toxic compared to some of the heavy metals and toxic chemicals used in other battery chemistries.

What is a LiFePO<sub>4</sub> battery pack?

They can operate over a wide temperature range, from relatively cold temperatures to high - temperature environments. In cold conditions,  $\text{LiFePO}_4$  battery packs generally maintain a better capacity retention compared to some other lithium - ion battery chemistries.
