If you encounter any installation or operational issues with your product, check the pertinent section of this manual to see if the issue can be resolved by following outlined procedures. Visit <https://> for additional assistance. This manual contains important.

The BC-1(R) Battery Cabinet is used for a system requiring a battery rated above 17 Ah. The BC-1(R) consists of a surface mount wall box and door. The cabinet can house up to two 24 Ah or two 40 Ah batteries. The BC-1(R) provides an internal terminal assembly for wiring the batteries to the fire.

The information provided in this document contains general descriptions, technical characteristics and/or recommendations related to products/solutions. This document is not intended as a substitute for a detailed study or operational and site-specific development or schematic plan. It is not to be.

If a charger is being installed, what is the cabinet style/size?

This is all necessary information for determining the minimum length, width

and height of the enclosure. There may be multiple ways to configure the cabinet, so consider all possible options. For instance, if a battery, rack and.

CellBlock Storage Cabinets are a superior solution for the safe storage of lithium-ion batteries and devices containing them. The cabinet shelves provide fire extinguishing capabilities via a gravity-fed system. Therefore, they must be installed correctly to be effective in a battery fire.
