Battery installation ESS system for communication base station

Overview

What are ESS home batteries?

Energy Storage System (ESS) Home Batteries are installed as part of a residential energy solar system which allows owners to capture and store energy from solar panels. Each ESS Home Battery is marked with a unique serial number, which can be used to identify affected batteries.

What is a telecom battery backup system?

A telecom battery backup system is a comprehensive portfolio of energy storage batteries used as backup power for base stations to ensure a reliable and stable power supply. As we are entering the 5G era and the energy consumption of 5G base stations has been substantially increasing, this system is playing a more significant role than ever before.

Should telecommunication operators invest in a telecom battery backup system?

Investing in a telecom battery backup system is always one of the priorities for telecommunication operators in the 5G era. Sunwoda 48V telecom batteries have a capacity covering 50Ah-150Ah, which can easily meet the power backup needs of macro and micro base stations.
