

SolarTech Power Solutions

Belarusian liquid cooling energy storage container supplier

Overview

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

What is a liquid cooling thermal management system?

The liquid cooling thermal management system for the energy storage cabin includes liquid cooling units, liquid cooling pipes, and coolant. The unit achieves cooling or heating of the coolant through thermal exchange. The coolant transports heat via thermal exchange with the cooling plates and the liquid cooling units.

Where is the liquid cooling unit located?

The liquid cooling unit, firefighting system, confluence chamber, and power distribution room are located at one end of the cabin, with the liquid cooling unit taking up the majority of the space. The liquid cooling piping runs along the bottom of the cabin, while the firefighting piping and wiring are laid out at the top.

What is a Bess container solution?

Semi-Integrated BESS Container Solution This configuration provides a ready-to-use base while still allowing flexibility for clients to integrate their preferred brands or technologies for PCS, EMS, or other components. It's the perfect balance between off-the-shelf convenience and personalized control.

3. Fully Integrated BESS Container Solution
