# **Can a solar system be installed in an apartment**

## Overview

---

However, it is entirely possible to install solar panels in an apartment. Whether on a balcony, on a shared rooftop, or in a common courtyard, there are accessible options available. Can I install solar panels on my apartment complex?

You also require space to keep inverters as well. As an apartment owner, you can choose to install solar panels on the terrace of your apartment complex and the society cannot refuse the request, provided there is a vacant space available on the rooftop. You can move the court if the society denies your request.

Can a landlord install a solar panel system?

While you may be able to pitch your landlord to install a rooftop solar panel system, community solar is more likely to be your best bet to enjoy the benefits of solar if you don't own your roof space through incentives like virtual net metering, community solar participants can earn credits back on their electricity bill, saving money every month.

Can you go solar if you rent a house?

If you rent your home and find that you aren't the right fit for community solar, you can still go solar in some other unorthodox ways, but components such as inverters can get expensive. The most straightforward option may be to ask your landlord or the company that owns your building to install panels.

How many solar panels can be installed on a balcony?

If your balcony is 12-feet long, you will be able to place 3-4 panels. You also require space to keep inverters as well. As an apartment owner, you can choose to install solar panels on the terrace of your apartment complex and the society cannot refuse the request, provided there is a vacant space available on the rooftop.

Should I go solar If I'm not a homeowner?

When looking for alternative ways to go solar, other than giving your landlord a call and talking through an installation on your apartment building or home, community solar (also known as roofless solar, solar gardens, or shared solar) is an excellent option for you to consider if you aren't a homeowner.

Can I install solar panels on my balcony?

Apartment owners or tenants can install solar panels on their balconies provided they receive sufficient sunlight. A person living on the second floor and 20th floor will receive different amounts of sunlight. If you have a building surrounding your view and there's no sunlight, then it won't be a viable option as the efficiency levels will reduce.
