

## **SolarTech Power Solutions**

# **Canada Emergency Energy Storage Power Supply**

## Overview

---

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.

How much energy storage does Canada need?

Image: NRStor. Energy Storage Canada's 2022 report, Energy Storage: A Key Net Zero Pathway in Canada indicates Canada will need a minimum of 8 to 12GW of energy storage to ensure Canada achieves its 2035 goals.

Can Canada reach the full potential for energy storage?

However, that leaves a wide gap to close to realize Canada's goals and to reach the full potential for energy storage in the country. Even the low end of the estimated potential for storage is equivalent to Manitoba's entire installed generating capacity as of 2020. Today's national installed capacity of energy storage is less than 1GW.

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

Does Canada need more energy storage for net zero?

Canada still needs much more storage for net zero to succeed Energy Storage Canada's 2022 report, Energy Storage: A Key Net Zero Pathway in Canada indicates Canada will need a minimum of 8 to 12GW of energy storage to ensure Canada achieves its 2035 goals.
