

SolarTech Power Solutions

Central Asia Temperature Controlled Container Wholesale

Overview

Do shipping containers need temperature control?

Due to harsh environments, shipping containers with built-in temperature control can be very necessary. Maximize the performance of your temperature-controlled shipping containers with our insulation, ventilation, and wall modifications. High-quality insulation helps maintain stable internal temperatures while reducing energy costs.

What is temperature controlled logistics?

Our Temperature Controlled Logistics Solutions present a secure and validated supply chain for your needs, integrating South Asia's leading logistics network with an innovative range of services. The innovative Temperature Controlled Solution ensures safe and compliant transport in frozen, chilled and ambient conditions.

What are passive V active containers for temperature-controlled logistics tower?

Passive v Active Containers for Temperature-Controlled Logistics Tower delivers proven physical and temperature protection for pharmaceutical and life science products. Our containers are designed to perform in all supply chains and storage facilities, regardless of the transport type or environment.

How can I improve the performance of my temperature-controlled shipping containers?

Maximize the performance of your temperature-controlled shipping containers with our insulation, ventilation, and wall modifications. High-quality insulation helps maintain stable internal temperatures while reducing energy costs. Ventilation can prevent moisture buildup and improve air circulation, minimizing the risk of mold and damage.

Can a shipping container cool a server room?

This container is being renovated to be a mobile container cooling system. It was built to our client's specifications to cool a server room. Server Rooms: Shipping containers can be converted into mobile server rooms, with reefer units ensuring that server equipment remains within safe temperature ranges.

What is temperature controlled solution?

The innovative Temperature Controlled Solution ensures safe and compliant transport in frozen, chilled and ambient conditions. Using appropriate cooling mediums, the packaging performance delivers temperature for the range - 20°C, 2 - 8°C and 15 - 25°C for varying distribution times.
