

**SolarTech Power Solutions**

# **Colombia Wind Solar and Energy Storage Project**

## Overview

---

As of 2023, Colombia's renewable electricity generation capacity was 14.3 GW. Most of this capacity is . is growing fast, and in 2023 accounted for about 5% of the renewable capacity, up from almost zero five years earlier. The country has significant wind and solar resources that remain largely unexploited. According to a study by the World Bank's (ESMAP), exploiting the country's significant wind pot.

The project is expected to create more than 16.000 direct and indirect jobs and significantly reduce CO2 emissions. The plan includes the collaboration of energy companies, the government, and indigenous communities, highlighting the Colectora transmission infrastructure.
