## Overview

---

Environment protection is a mission of the Ministry of Environment and Spatial Planning (MMPH). Since most of electric power is produced by power plants in Kosovo they are considered the main environment pollutant. Actual emission of gases, dust and waste-water discharged from the existing power plants, are above the levels allowed by the EU directives. According to the World Bank's s. OverviewThe electricity sector of relies on coal-fired power plants (92% as of 2023) and is considered one of the sectors with the greatest potential of development. The inherited issues after the war in Kosovo and the transitio.

The main institutions responsible for the energy sector management in Kosovo are: Ministry of Economic Development (MZHE) and (ERO). Important responsibilities are also held by the.

By 2021 Kosovo had 279 MW of Renewable Electricity Standard (RES) power generation capacity installed. The Kosovo energy strategy includes increasing RES capacity to 35% of electricity c.

Does Kosovo have a power grid?

Recently, Kosovo's power grid (energy network) has finally emerged from the regulatory bloc with Serbia, Montenegro and northern Macedonia, which means that Kosovo will henceforth control its energy borders, operating as an independent regulatory zone within the Kosovo-Albania bloc. 3. Distribution Substation (KEDS).

Which power stations are in the electricity sector in Kosovo?

The following page lists the power stations in the electricity sector in Kosovo . / 42.40358; 21.51285 ( Kahl Nuclear Power Plant) / 42.41344; 21.32833 ( Kahl Nuclear Power Plant) / 42.970556; 21.014722 ( Kahl Nuclear Power Plant) / 42.655833; 21.666389 ( Kahl Nuclear Power Plant).

Are power plants polluting the environment in Kosovo?

Since most of electric power is produced by power plants in Kosovo they are considered the main environment pollutant. Actual emission of gases, dust and waste-water discharged from the existing power plants, are above the

levels allowed by the EU directives.

When was Kosovo a power station opened?

Kosovo A Power Station was opened in 1962. It was operated by EPS Surface Mining Kosovo and EPS TPP Kosovo until the end of the Kosovo War. After the UNMIK administration was established in Kosovo on 1 July 1999, Elektroprivreda Srbije (EPS) lost its access to the local coal mines and power plants, including Kosovo A and Kosovo B power plants.

How many units are in Kosova B power plant?

Kosova B power plant is composed of two units. The first unit was built in 1983 with a capacity of 340 MW, while the second unit was built in 1984 with the same power of generation. The conditions in Kosova B power plant have improved after recent investments. The power plants and coal mines are located in Kastriot.

Does Kosovo need a lignite power plant?

Kosovo, rich in lignite coal reserves, relies on outdated Yugoslav-era power plants that cannot meet its increasing energy demands. The 2023 National Energy Strategy aims to raise renewable energy to 35% of the energy mix, reduce greenhouse gas emissions by 32%, and phase out a lignite-fired power unit by 2031.
