

SolarTech Power Solutions

Containerized electrical solar inverter

Overview

The containerized integrated photovoltaic inverter station centralizes all essential equipment required for a grid-connected PV power system — including AC/DC distribution units, inverters, and monitoring and communication devices — within a specially designed, sealed enclosure. Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

What is a proinsener solar inverter station?

Proinsener Solar inverter stations are designed and integrated specifically for each project. It is an easily installable and compact product perfect for generating solar power on a large scale. All this allows easy and quick field connection to the medium voltage transforming station (MV), which reduces transport and installation costs.

What is LZY containers?

LZY Containers provide innovative mobile solar container solutions for businesses worldwide. Our mobile solar systems are designed to be reliable, efficient and easy to use. Explore LZY Containers's customizable and scalable solar container solutions, with rapidly deployable folding PV panels combined with containerized designs.

What is GE flexinverter 2kV solar power station?

Integrated power conversion solution for solar and battery energy storage applications. In addition to our widely deployed 1.5kV FLEXINVERTER platform, GE Vernova is proud to introduce the brand new FLEXINVERTER 2kV Solar Power Station. Let's start the next chapter in utility scale solar power! Why 2000 Vdc?

.

How a photovoltaic inverter station works?

In each inverter station all of the necessary equipment is integrated to connect to the medium voltage network of the photovoltaic plant, always complying with the standards of performance and quality required according to the project and its location.
