

SolarTech Power Solutions

Containerized no-current battery

Overview

What is a containerized battery energy storage system?

Our's Containerized Battery Energy Storage Systems (BESS) offer a streamlined, modular approach to energy storage. Packaged in ISO-certified containers, our Containerized BESS are quickly deployable, reducing installation time and minimizing disruption.

What is a containerized battery room?

The containerized battery room includes battery pack 1, battery pack 2, fire protection system, and battery management system (BMS). The electrical room includes a data acquisition system and power conversion system (PCS). The energy storage battery cluster is connected to the power transformer through the PCS.

What is the operating voltage of a containerized energy storage system?

The total operating voltage of the battery system is from 772.8 V to 993.6 V. The schematic of the operation of the containerized energy storage system is shown in Fig. 1 (b). The containerized energy storage system is mainly divided into the containerized electrical room and the containerized battery room.

What is the capacity of a containerized energy storage system?

The capacity of the energy storage system is 1.114 MWh. The rated output voltage is 380 V with a range of 342 V–418 V. The total operating voltage of the battery system is from 772.8 V to 993.6 V. The schematic of the operation of the containerized energy storage system is shown in Fig. 1 (b).

How safe is Huijue's containerized battery system?

Safety is a top priority for Huijue's Containerized BESS. The containers are constructed to meet rigorous safety standards, and the battery systems incorporate multiple layers of protection, including thermal management, fire suppression, and overcharge/overdischarge prevention.

What is C&I battery energy storage system?

Our C&I Battery Energy Storage System (BESS) is a high-capacity industrial battery storage solution, grid-connected to optimize energy usage and reduce costs.
