# **Cost of an energy storage cabinet**

## Overview

---

How much does the energy storage system cost?

The energy storage system is a 4MW, 32MWh NaS battery consisting of 80 modules, each weighing 3 600 kg. The total cost of the battery system was USD 25 million and included USD 10 million for construction of the building to house the batteries (built by Burns & McDonnell) and the new substation at Alamito Creek.

How much does a used storage cabinet cost?

The average selling price for a used storage cabinet on 1stDibs is \$4,256. Prices can vary, with the lowest priced cabinet selling for \$1 and the highest priced one going for as much as \$1,372,884. Used storage cabinets can differ in price due to various characteristics.

Does storage reduce electricity cost?

Storage can reduce the cost of electricity for developing country economies while providing local and global environmental benefits. Lower storage costs increase both electricity cost savings and environmental benefits.

Should energy storage be co-optimized?

Storage should be co-optimized with clean generation, transmission systems, and strategies to reward consumers for making their electricity use more flexible. Goals that aim for zero emissions are more complex and expensive than net-zero goals that use negative emissions technologies to achieve a reduction of 100%.

Why is energy storage important?

Energy storage is a potential substitute for, or complement to, almost every aspect of a power system, including generation, transmission, and demand flexibility. Storage should be co-optimized with clean generation, transmission systems, and strategies to reward consumers for making their electricity use

more flexible.

### What is the future of energy storage?

Storage enables electricity systems to remain in balance despite variations in wind and solar availability, allowing for cost-effective deep decarbonization while maintaining reliability. The Future of Energy Storage report is an essential analysis of this key component in decarbonizing our energy infrastructure and combating climate change.
