Croatia s regulations on wind and solar complementary communication base stations

Overview

How is the renewables sector regulated in Croatia?

The renewables sector in Croatia is regulated by several main acts, but there are also many other legislative acts relevant to the development of renewable energy projects. The most relevant ones are addressed in Chapter 3 - Legal Framework for Renewable Energy Sources.

How should the Republic of Croatia address renewable energy projects?

The Republic of Croatia should address the different barriers for the development of renewable energy projects by increasing transparency in its permitting process, continuing with digital transformation, and introducing additional regulatory changes.

Does Croatia need energy approval?

With the changes to the Electricity Market Act, energy approval will also be required. According to the Croatian legislation, the construction of energy generation facilities is of interest to the Republic of Croatia.

Does Croatia have a legal interest in the construction of energy facilities?

According to the Croatian legislation, the construction of energy generation facilities is of interest to the Republic of Croatia. Thus, in order to prove legal interest it will suffice to accompany the application with proof that the request for expropriation (for privately).

Which renewable energy source is most used in Croatia?

In 2017, solid biomass was the most used renewable energy source in Croatia, representing 65% of all RES use. By 2050 the share of solid biomass is expected to decrease, while the biggest changes are expected in the share of wind and solar.

How will the energy mix change in Croatia?

Also, it is project-ed that the RES share in gross final energy consumption will reach 36.6% by 2030, and 53.2% by 2050. In the long-term, the energy mix will change significantly in order to re-duce the consumption of fossil fuels and to increase the use of renewable energy sourc-es in Croatia.
