Cuba monocrystalline solar panel investment

Overview

How many solar parks will Cuba have this year?

Cuba is making progress on a China-backed plan to install more than 50 solar parks this year capable of churning out more than 1,000 megawatts, the Energy Ministry said late on Wednesday, just days after the country's antiquated grid collapsed and left millions in the dark.

Is investing in Cuba becoming more difficult?

Investing in Cuba is becoming increasingly difficult,” commented user Horus on an article about the issue published on Cubadebate, the country’s most-read state news portal. The law could discourage entrepreneurship in small industries or productive areas that typically consume significant electricity.

How much does a 1 KW generator cost in Cuba?

At state-run Copextel retail stores, a basic 1 KW generation module costs 2,551 MLC, pegged to the US dollar. The average salary in Cuba is 4,648 pesos (approximately \$38.70) based on the official exchange rate of 120 pesos to one dollar.
