As demand for energy storage soars, traditional battery technologies face growing scrutiny for their cost, environmental impact, and limitations in energy density. These challenges have fueled a surge of innovation in battery research, driving engineers and scientists to explore groundbreaking.

The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the research and development (R&D) and Markets & Policies Financials cases. The 2024 ATB.
