

**SolarTech Power Solutions**

**Customized energy storage  
battery manufacturer in the  
Republic of South Africa**

## Overview

---

Who is Enertec batteries?

Enertec Batteries was founded in 1982, it is a well-known lithium battery and energy storage product supplier in South Africa. With 40 years of industry experience, it offers a wide range of products including lead-acid batteries, lithium batteries, energy storage systems, inverters, and other solar components.

Which countries supply lithium batteries to South Africa?

China, having established battery storage manufacturing facilities, has been the primary supplier of lithium cells and batteries to South Africa between 2019 and 2022. South Africa's transition from coal-dominated electricity generation to renewable energy sources such as wind and solar presents an opportunity to increase battery pack imports.

Does South Africa have a battery storage sector?

South Africa's vast reserves of manganese and vanadium position the country to take on a more prominent role in the battery storage sector. Manganese, an essential element in lithium-ion batteries used for powering electric vehicles (EVs) and renewable energy grids, is particularly significant. Have you read?

Who makes high-voltage batteries in South Africa?

In 2025, LBSA also developed a high-voltage battery for industrial use, with strong focus on safety, reliability, and efficiency. If you're looking for affordable, high-quality batteries in South Africa with after-sales support, check out LBSA. BlueNova was founded in 2015, with offices in Cape Town and Gauteng.

How many jobs will battery manufacturing create in South Africa?

China has created about 3 million jobs in clean energy manufacturing, with 80% of these jobs making modern battery storage, according to the IEA. A study by CES Energy Solutions commissioned by the World Bank in 2021, estimates that battery manufacturing could create up to 60,000 new jobs in South Africa.

Can South Africa produce a battery?

The Netherlands is the primary destination for South Africa's ferro-alloys and ferro-vanadium exports, while South Korea is a growing market for these products. South Africa lacks the manufacturing capabilities for the production of battery storage. It remains to be proven whether such an activity would be competitive domestically, says Nikomarov.
