

SolarTech Power Solutions

Danish solar module generation

Overview

Solar power in Denmark amounts to 4,832 MW of grid-connected PV capacity at the end of September 2025, [1] and contributes to a government target to use 100% renewable electricity by 2030 and 100% renewable energy by 2050. [2][3] Solar power produced 11.2% of Danish electricity generation in 2024, the highest share in the Nordic countries. [4][5]
