

SolarTech Power Solutions

Desert solar Container

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Why should you choose a solar power system in the desert?

The abundance of sunlight in the deserts makes solar-powered systems the most obvious choice in these areas. The container's folding system can quickly stow the panels in case of sandstorm thus prevent any potential damage. The perfect solution to supply energy to all sorts of military bases and conflict zones.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

Can a solar array be used inside a container?

Solar arrays inside of a container are applicable in a number of ways. Constant improvements in PV technology make it a great, future-proof solution. Below you can find just a few examples of the possible applications. The abundance of sunlight in the deserts makes solar-powered systems the most obvious choice in these areas.

Why should you choose a mobile solar container?

The efficient hydraulic system helps quickly prepare the Solar to work.

Because of their construction, our containers offer unmatched flexibility and mobility. Great protection for the sensitive solar arrays against storms, vandalism, and all kinds of possible threats. Mobile solar containers application visuals.

Why do petroleum companies use mobile solar containers?

Petroleum companies often operate in distant locations with limited access to grid power. This is where a mobile solar containers can act as an additional power source to run the equipment. Good choice for disaster reliefs whenever it is important to deliver electricity as quickly as possible.
