Djibouti Emergency Energy Storage Power Supply

Overview

The peak annual demand in 2014 was about 90 MW but is expected that it will grow to about 300 MW by around 2020. Electricity supply services are provided through the vertically integrated utility Electricité de Djibouti (EDD). A small amount of additional energy is generated by a solar plant (300 kW capacity). Djibouti has wind and geothermal generation potential and is actively studying these options.

How does electricity supply work in Djibouti?

Electricity supply services are provided through the vertically integrated utility Electricité de Djibouti (EDD). A small amount of additional energy is generated by a solar plant (300 kW capacity). Djibouti has wind and geothermal generation potential and is actively studying these options.

How many people in Djibouti have access to electricity?

In Djibouti, 42% of the population has access to electricity. The government's Vision 2035 establishes goals to promote renewable energy source use for electricity generation and to pursue fuel-switching measures from fossil to renewables.

How much energy does Djibouti consume?

According to USAID, Djibouti consumes 100 megawatts of electricity, but only 57 megawatts are reliably available to serve the population due to underdeveloped energy infrastructure. Much of Djibouti's remaining energy comes from its own geothermal, solar, wind and biomass sources.

How much does electricity cost in Djibouti in 2022?

Average annual growth in workload + 5%. □ Access to electricity in 2022 : - 70.3% in the city of Djibouti - 20-50% in regions and cities - National average: 60.2% - Average cost of electricity (2022): US\$0.21/kwh □ Electricity sector: Demand multiplied by 5 to 10 by 2027.

What are the different types of energy transformation in Djibouti?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Djibouti for 2021. Another important form of transformation is the generation of electricity.

What is Djibouti's Vision 2035?

A small amount of additional energy is generated by a solar plant (300 kW capacity). Djibouti has wind and geothermal generation potential and is actively studying these options. Djibouti's Vision 2035 aims to achieve universal electricity access and power the nation with 100% renewable energy.
