

## Overview

---

What is the first solar-plus-storage project in the Dominican Republic?

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisión Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project shortly in late December (22 December).

How many solar projects are there in the Dominican Republic?

The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV electrical energy. These projects cover an installed capacity between 3 MW and 58 MW (see Fig. 5.). Next, a brief inventory first of its kind in the country.

Are there solar power stations in the Dominican Republic?

Photovoltaic Power Stations (current and possibles - in study) in Dominican Republic. Own elaboration. The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV electrical energy.

Is solar energy a viable resource for the Dominican Republic?

High solar potential, along with integrating efficiencies and economies of scale, can make solar energy a viable resource for the Dominican Republic. Similarly, wind energy has strong potential, particularly in the southwest.

What is the installed capacity of photovoltaic energy in the Dominican Republic?

The installed capacity of photovoltaic energy in the Dominican Republic is 0.43 GW. 5. Photovoltaic energy in the Dominican Republic is increasing rapidly and could 1. Introduction currently a topic of high priority and relevance worldwide. Among these strategies are those that lead to the

reduction of greenhouse gases (GHG) .

Does Dominica have solar power?

2013 and 2014: A government-led initiative installed LED streetlights. Dominica has high solar potential with a solar resource of 5.6 kWh per square meter per day and also has approximately 30 MW of wind power potential, some of which is under development.
