Egypt exports energy storage batteries

Overview

“Achieving financial close for Egypt’s first utility-scale BESS project—following the successful launch of our 500MW wind farm in Egypt—is a clear demonstration of our ability to deliver large scale renewable energy projects.

“Achieving financial close for Egypt’s first utility-scale BESS project—following the successful launch of our 500MW wind farm in Egypt—is a clear demonstration of our ability to deliver large scale renewable energy projects.

Cairo, Egypt, June 15, 2025 – IFC today announced an investment to support Egypt’s first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central Asia, and the Government of Egypt to.

Dubai-based developer Amea Power has agreed to build a 1 GW solar plant with a 600 MWh battery energy storage system (BESS) and an additional 300 MWh BESS. Meanwhile, Norwegian developer Scatec ASA has signed a 25-year power purchase agreement (PPA) for a 1 GW solar array and 100 MW/200 MWh BESS in.

Arab Finance: The Egyptian Electricity Transmission Company (EETC) and the Infinity-Hassan Allam consortium signed the complementary agreements to establish two solar power projects and two interconnected battery storage plants with a total capacity of 1,200 megawatts and 720 megawatt-hour of.

The BESS will deliver approximately 100,000 MWh and cut nearly 20,000 tons of CO2 emissions annually, contributing to Egypt’s goal of reducing power sector emissions by 37%. The International Finance Corporation (IFC) has announced a \$72 million investment to support Egypt’s first utility-scale.

Hassan Allam Utilities Energy Platform and Infinity Power have signed power purchase agreements with the Ministry of Electricity and Renewable Energy and the Egyptian Electricity Transmission Company (EETC) to develop two large-scale solar projects totalling 1,200 MW and 720 MWh of battery storage.
