

**SolarTech Power Solutions**

# **Energy Storage Park Power Sales Project**

## Overview

---

How do energy parks work?

Energy parks integrate multiple renewable energy source and storage solutions like batteries, and potentially co-locate with electricity consumers such as factories or data centers, all connected to the grid at a single point. They do this to speed up development, share costly onsite infrastructure, and directly connect complementary resources.

What is New York state's energy storage plan?

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.

What is nycida's largest battery energy storage project?

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households.

Why is energy storage important?

Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers. Energy storage is essential to a resilient grid and clean energy system.

Are energy parks a solution to rising electricity demand?

Energy parks are an affordable, quick solution to rising electricity demand. As we seek to clean up our electricity supply and leverage zero-emission electricity to cut climate pollution from buildings, transportation and industry,

we need to think outside the box to reach the speed and scale our times demand.

Can a battery storage system help reduce power outages?

Read more: Skanska is about to transform a Brooklyn marine terminal into a major offshore wind hub To limit power outages and make your home more resilient, consider going solar with a battery storage system.
