

SolarTech Power Solutions

Energy storage charging pile installation in the Philippines

easy to install and use

World wide Products

faster charging and discharging

Multiple protection with alarm systems

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO₄

Overview

What is the Philippines' first solar-plus-storage hybrid?

The Philippines' first large-scale solar-plus-storage hybrid (pictured), was commissioned in early 2022. Image: ACEN. The Philippines Department of Energy (DOE) has outlined new draft market rules and policies for energy storage, a month after the country allowed 100% foreign ownership of renewable energy assets.

How ACEN is revolutionizing energy solutions in the Philippines?

ACEN is revolutionizing energy solutions in the Philippines with cutting-edge battery storage projects. These initiatives are tailored to enhance grid reliability, allowing for smoother integration of renewable sources and providing critical backup during peak demands.

What is battery energy storage system (BESS)?

The Battery Energy Storage System (BESS) is part of a hybrid project combining a 16 MW wind power facility and the battery storage provided by Gamesa Electric. We supplied, installed and commissioned the complete energy storage system consisting of two Gamesa Electric Stor PCS charger stations and two Stor DC battery stations. The project also [.].

Why is ACEN redefining energy transition in the Philippines?

Each project is a step forward in our mission to deliver efficient and sustainable energy solutions across the region. ACEN is redefining energy transition in the Philippines through the strategic implementation of advanced energy storage systems co-located in some of its renewable energy projects.

Why is Acen a battery storage company?

Battery storage systems support the integration of renewable energy sources, reducing dependence on fossil fuels and decreasing greenhouse gas emissions. To enhance grid stability and reliability, ACEN is also making

strides as a battery storage company to complement its renewable energy projects in select markets.

What are energy storage systems?

It said the definition of energy storage systems, or ESS, will be facilities capable of absorbing energy generated from a renewable energy source or generation facility connected to the grid, and injecting stored energy when needed.
