Energy storage projects pay taxes

Overview

To calculate the amount your § 48 or § 48E project is eligible for, multiply the applicable tax credit percentage by the “tax basis,” or the amount spent on an eligible unit of energy property or qualified facility (or energy storage technology).

To calculate the amount your § 48 or § 48E project is eligible for, multiply the applicable tax credit percentage by the “tax basis,” or the amount spent on an eligible unit of energy property or qualified facility (or energy storage technology).

This tax credit can help offset the costs associated with qualified energy property and facilities. How can a tax-exempt entity use these Investment Tax Credits (ITC)?

Eligible tax-exempt and governmental entities can claim the § 48 ITC and § 48E Clean Electricity ITC for qualified energy property.

This tax credit can help offset the costs associated with qualified energy property and facilities. How can a tax-exempt entity use these Investment Tax Credits (ITC)?

Eligible tax-exempt and governmental entities can claim the § 48 ITC and § 48E Clean Electricity ITC for qualified energy property.

The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of residential and utility-scale solar while undermining the growth of U.S. manufacturing. SEIA has outlined the high-level policy changes below. 48E/45Y – The Clean Energy.
