

SolarTech Power Solutions

Entry-level solar container battery

Overview

What is a containerised energy storage system (BESS)?

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage technologies and for different purposes. For installation manual, technical datasheet, inverter adjustment/testing or configuration, please send us inquiry.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

Which battery bank should I choose for the Instant off-grid containers?

Choose between a GEL Deep Cycle Sealed Lead Acid battery bank or a next-gen Lithium Iron bank. See below for more details and pictures. Pre-configured by RPS engineers. 370W solar panels power the Instant Off-Grid Containers. Each panel measures 69.1"×40.9"×1.4".

How many lithium batteries can a hybrid inverter stack?

Stack up to 9 Lithium Batteries per system! Just give our office a call and ask about adding more power storage. Delivering 10,000W of rated power output, this rugged pure sine wave hybrid inverter is capable of pairing with either GEL or LI batteries. Dual MPPTs provide 99% efficiency. Provides 120V and 220V output power.
