# **Estonia's high-tech home energy storage**

## Overview

---

Estonian renewable energy company Freen OÜ has launched a 10 kWh sodium-ion home energy storage solution, designed to integrate seamlessly with both solar panels and small wind turbines.

Estonian renewable energy company Freen OÜ has launched a 10 kWh sodium-ion home energy storage solution, designed to integrate seamlessly with both solar panels and small wind turbines.

The new home energy storage solution from Estonia's Freen is based on sodium-ion battery chemistry and can be coupled with both rooftop PV and small wind turbines. From ESS News Estonian renewable energy company Freen OÜ has launched a 10 kWh sodium-ion home energy storage solution, designed to.

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru.

The Baltic Storage Platform joint venture – bringing together French independent solar power producer Corsica Sole, Estonia's leading renewable energy developer Evecon, and Mirova, an affiliate of Natixis Investment Managers dedicated to sustainable investment – has successfully secured €85.6.

In a significant step toward sustainable home energy solutions, Estonian renewable energy company Freen OÜ has launched a 10 kWh residential sodium-ion battery system. Announced on March 18, 2025, this innovative product promises to redefine energy storage for households by offering an.

Estonian energy company Eesti Energia opened the Baltic's largest battery storage at the Auvere industrial complex. This state-of-the-art storage system is already enhancing the stability of the regional electricity grid and mitigating high peak electricity prices for consumers. According to.

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, marking a crucial step toward synchronizing the Baltic power grids with the rest of Europe by 2025. The project, spearheaded by the Baltic Storage Platform—a joint venture between Estonian energy.
