Fiji Industrial Park Power Storage

Overview

With plans to deploy 50MW of storage by 2027, Fiji's becoming the Switzerland of energy innovation – neutral in the fossil fuel wars, armed with killer battery tech. Upcoming projects include underwater compressed air storage (perfect for marine parks) and coconut biochar carbon capture. How does Fiji ensure long-term energy security?

The Fijian Government seeks to ensure Fiji's long-term energy security by increasing the availability of data and information required to support investments designed to increase the reliability and resilience of the national energy infrastructure.

Why is Fiji's energy sector a long-term priority?

The resilient development and diversification of Fiji's energy sector is a long-term priority for the Fijian Government due in part to rising national energy demand, volatile oil prices, ageing energy infrastructure, and the intensifying impacts of climate change and disaster events on Fiji's infrastructure, environment, people, and economy.

What is Fiji's Energy Trilemma?

As is the case in most national contexts, the oversight of Fiji's energy sector is defined by the 'energy trilemma' which requires continual efforts to balance the challenges of energy security, energy sustainability, and energy access/equity.

What is Fiji's 'Our Energy & Our Future' Policy?

The subtext of this Policy: 'Our Energy, Our Future' is demonstrative of the Fijian Government's intention to progress Fiji's national energy services to meet immediate challenges and set a long-term course for sustainability.

What is Fiji's national energy policy 2023-2030?

Fiji's National Energy Policy 2023-2030 is the blueprint towards a highly

sustainable, inclusive, reliable, and affordable energy services sector by the close of the decade. It sets a strong policy foundation for the transformational investments that are urgently needed to revolutionise our energy sector for the better.

How will Fiji support universal electricity access?

The Fijian Government will help support universal access to affordable electricity through a focus on policies and investments that create electricity access for the remaining 4.5% of the population that is without access to reliable sources of electricity via either on-grid or off-grid energy sources.
