Georgia Energy Storage Capacity Price

Overview

As of October 2025, the average storage system cost in Georgia is \$1580/kWh. Given a storage system size of 13 kWh, an average storage installation in Georgia ranges in cost from \$17,459 to \$23,621, with the average gross price for storage in Georgia coming in at \$20,540.

As of October 2025, the average storage system cost in Georgia is \$1580/kWh. Given a storage system size of 13 kWh, an average storage installation in Georgia ranges in cost from \$17,459 to \$23,621, with the average gross price for storage in Georgia coming in at \$20,540.

How much do storage systems cost in Georgia in 2025?

As of October 2025, the average storage system cost in Georgia is \$1580/kWh. Given a storage system size of 13 kWh, an average storage installation in Georgia ranges in cost from \$17,459 to \$23,621, with the average gross price for storage in.

Georgia Power is seeking 500 MW of energy storage that can discharge for at least two hours. The energy storage can be standalone, or with a new or existing renewable resource. Ascend Analytics is administering the request for proposal (RFP) on behalf of Georgia Power. Georgia Power said it prefers.

What is Georgia Power's Energy Storage plan?

The RFP targets energy storage capacity included in the company's integrated resource plan approved by the Georgia Public Service Commission in 2022. The solicitation is part of Georgia Power's ongoing efforts to add renewables and bolster the reliability of its electric grid.

Does Georgia Power have a battery energy storage system?

Georgia Power is already operating battery energy storage systems and has plans for more. The utility's 65-MW Mossy Branch BESS is located in Talbot County and began commercial operation in November 2024. Another 765 MW was authorized by the Georgia PSC and is projected to enter commercial operation in 2026, the utility said.

When will energy resources be available in Georgia?

A draft request for proposals specifies the resources should be online in 2028 at the earliest and no later than the end of 2031. Projects online by Nov. 28, 2031, will be given preference. The RFP targets energy storage capacity included in the company's integrated resource plan approved by the Georgia Public Service Commission in 2022.
