# **Germany's anti-corrosion power plant BESS**

## Overview

---

What changes have been made to Bess projects in Germany?

The German legal framework for BESS projects is currently also in a process of changes: The German parliament adopted a comprehensive energy reform package on 31 January 2025, which includes relevant changes for BESS projects with the aim to further support the growth of storage capacities in Germany.

Are battery energy storage systems a success in Germany?

BESS in Germany: Booming success with a built-in ceiling?

Battery energy storage systems (BESS) are experiencing a remarkable upswing in Germany - and quite rightly so. They offer one of the key need that an energy system increasingly characterised by renewable energies needs: short term Flexibility.

When will Bess energy reform come into force in Germany?

On January 31 2025, the German Parliament adopted a comprehensive energy reform package which includes, *inter alia*, the following changes for BESS projects which are expected to enter into force in March 2025:..

How much will a new Bess power plant cost?

Now, another 600 MW/1.2 GWh are planned From ESS News German energy company RWE is building a 600 MW/1.2 GWh BESS on the site of the former Westfalen coal-fired power plant in Hamm, North Rhine-Westphalia. The utility on Friday said the plant would cost a “mid-three-digit million euro” figure.

Is Bess a market of the future in Germany?

BESS are undoubtedly a market of the future in Germany. However, economic success depends not only on the technology, but also on strategic risk management. Anyone investing should know whether - and how - risks are

hedged. Optimistic scenarios alone are not enough. The energy transition needs storage.
