

**SolarTech Power Solutions**

# **Guinea base station energy storage equipment hybrid power supply**

## Overview

---

Are base transceiver stations environmentally friendly?

The only electrical source currently in service in the Base Transceiver Stations (BTS) is a diesel generator. As a result, diesel generators are not economical and are not environmentally friendly. Therefore, these sites must integrate sustainable energy sources like wind and solar [ 4 ].

What is a base transceiver station?

The base transceiver station is one of the main components of cell sites that consume energy. Diesel fuel purchases for generators, which make up over 80 % of plant-level energy expenditures at off-grid and off-grid tower sites, are the primary source of these costs.

Which power supply mode is used for micro base station?

For the micro base station, all-Pad power supply mode is used, featuring full high efficiency, full self-cooling and smooth upgrade for rapid deployment and site construction & operation costs reduction.
