Heishan Industrial Park Energy Storage Industrial Park

20 ft container

40 ft container

Overview

What's new in China-Singapore's Suzhou Industrial Park?

LOW-CARBON INNOVATIONS GO GLOBAL In Jiangsu's Suzhou Industrial Park, a joint China-Singapore zero-energy building fitted with rooftop photovoltaic panels, small wind turbines and an AI-controlled lighting and climate system showcases the possibilities of future urban architecture.

What is Shanghai new display industrial park?

The Shanghai New Display Industrial Park focuses on next-gen information technology to become a key player in the domestic display industry, contributing to the 'Shanghai Bay Area's industrial progress.

How can HEIC be used in industrial parks?

The IN-IES planning model with HEIC is established, including hydrogen production, transportation, and storage. For industrial parks where hydrogen is commonly utilized, a feasible solution for planning the coupling of hydrogen and other energies is provided in this paper.

What is the heating and cooling load of the Industrial Park?

It is assumed that land area occupied by the industrial park is 26 km², and 24 km² is adopted for buildings. The heating and cooling loads of buildings are shown in Fig. 4 (a), which are simulated by the hourly air temperature. Among them, the maximum cooling load is 2933.78 kW, and the maximum heating load is 1439.52 kW.

Can a hydrogen compressor be used in industrial park-integrated energy systems?

Different hydrogen compression levels are utilized to hydrogen compressor models. Establishing an industrial park-integrated energy system (IN-IES) is an effective way to reduce carbon emission, reduce energy supply cost and improve system flexibility. However, the modeling of hydrogen storage in

traditional IN-IES is relatively rough.

What is Shanghai's first hydrogen energy & fuel cell industrial park?

[Photo/WeChat account: sh-jiading] Jiading Hydrogen Park, Shanghai's first hydrogen energy and fuel cell industrial park, has attracted over 50 hydrogen energy and intelligent automobile industrial projects that have a total investment of over 10 billion yuan (\$1.57 billion), local media outlets reported on Jan 22.
