

How big a container should I use for solar installation

GRADE A BATTERY

LiFepo4 battery will not burn when overcharged over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

Overview

A 20ft shipping container can typically accommodate 6 to 12 solar panels, depending on panel size and mounting configuration. With six to twelve 300W panels, you can expect around 1.8 kWp to 3.6 kWp of power.
