

How many watts does the IP67 solar integrated machine have

Overview

Our inverter boasts a maximum output of 1200W and an operating voltage range of DC18V-50V, supporting 2 groups of solar panel module access. With our state-of-the-art MPPT technology, the energy conversion efficiency is up to 99.5%.

Our inverter boasts a maximum output of 1200W and an operating voltage range of DC18V-50V, supporting 2 groups of solar panel module access. With our state-of-the-art MPPT technology, the energy conversion efficiency is up to 99.5%.

At its core lies a formidable 2300Wh lithium-iron-phosphate (LFP) battery, capable of delivering a staggering 2400W of continuous output to power your critical life-saving equipment.

High-quality micro-inverter for balcony solar power systems with a 600/800/1600/2000 W output; Output nominal voltage: 120/230 V. Aluminum alloy body in high pressure oxidation process with good corrosion and oxidation resistance.

Users report consistent outputs, with some achieving 550-600 watts on sunny days. The AC digital meter displays essential data, including voltage, current, and power factor, enhancing system monitoring capabilities.

Solar Panel: The solar street light features a 100-watt solar panel. The panel is adjustable up to 180 degrees for optimal positioning. **Battery:** This system is powered by a 12V 42 aH lithium iron phosphate battery. On a full charge, the battery provides 3 days of operation without sun.
