On average, homeowners can expect to pay between \$7,000 and \$15,000 for a complete system, including installation. This price range typically covers lithium-ion batteries, which are the most common type due to their efficiency and longevity.

Installation Costs: Installing the system can cost anywhere from \$1,000 to \$3,000. This depends on how complex the installation is and whether any extra work is needed, like electrical upgrades.

Most homeowners pay between \$6,000 and \$12,000 for a solar storage system, including the battery and installation. While some systems can cost over \$30,000, that's usually for larger or more complex setups.
